THE UNIVERSITY

The Hong Kong University of Science and Technology (HKUST) was incorporated in April 1988, and opened in October 1991, as a world-class technological university dedicated to the advancement of learning and research scholarship. It seeks to educate men and women who will contribute to Hong Kong's economic and social well-being, and to promote research, development, and entrepreneurship in the Asia-Pacific region.

This third publicly funded university in Hong Kong comprises four Schools. Three of the Schools—Science, Engineering, and Business & Management—provide both undergraduate and postgraduate education through to the doctorate. The School of Humanities and Social Science offers postgraduate education to the doctoral level, and provides general education to all undergraduates.

The University's campus occupies a 60-hectare site of sweeping beauty on the Clear Water Bay Peninsula of Sai Kung.
